

**LISTING AND STATUS OF THE CLAIMS**

The following is a complete listing of all the claims in the application,  
with an indication of the status of each:

- 1        1. (Currently amended) An on-line shopping system comprising:  
2                a commerce provider server connected to a network;  
3                a first terminal, ~~provided at a user's home and~~ connected to said  
4 network, for receiving goods information from said commerce provider  
5 server and transmitting selected goods information and an identification  
6 number of said user to said commerce provider server; and  
7                a second terminal different from said first terminal, provided at a  
8 store and connected to said network, for transmitting said identification  
9 number to said commerce provider server and receiving said selected  
10 goods information from said commerce provider server to acknowledge  
11 said selected goods information, said second terminal acknowledging a  
12 settlement by the user at the store signifying that goods may be delivered.
  
- 1        2. (Original) The system as set forth in claim 1, wherein said commerce  
2 provider server comprises a storing unit for storing selected goods  
3 information in correspondence with identification numbers.
  
- 1        3. (Original) The system as set forth in claim 1, wherein said network  
2 comprises the Internet.
  
- 1        4. (Original) The system as set forth in claim 1, wherein said first terminal  
2 carries out a combination of information and transmits combined  
3 information along with said identification number to said commerce  
4 provider server,  
5                said commerce provider server storing said combined information  
6 in correspondence with said identification number,

7           said second terminal receiving said combined information from  
8           said commerce provider server in correspondence with said identification  
9           number.

1           5. (Original) The system as set forth in claim 4, wherein said second  
2           terminal prints said combined information.

1           6. (Currently amended) An on-line shopping method comprising the steps  
2           of:

3                 connecting a first terminal ~~provided at a user's home~~ via a network  
4                 to a commerce provider server;

5                 transmitting goods information from said commerce provider  
6                 server via said network to said first terminal;

7                 transmitting selected goods information and an identification  
8                 number from said first terminal via said network to said commerce  
9                 provider server;

10                transmitting said identification number from a second terminal  
11                different from said first terminal, provided at a store, to said commerce  
12                provider server; and

13                transmitting said selected goods information in correspondence  
14                with said identification number from said commerce provider server via  
15                said network to said second terminal;

16                carrying out a settlement at the store by the user; and

17                delivering said selected goods.

1           7. (Original) The method as set forth in claim 6, wherein said network  
2           comprises the Internet.

1           8. (Currently amended) An on-line shopping method comprising the steps  
2           of:

3                 connecting a first terminal ~~provided at a user's home~~ via a network

4 to a commerce provider server;  
 5 carrying out a combination of information at said first terminal;  
 6 transmitting combined information and an identification number  
 7 from said first terminal via said network to said commerce provider server;  
 8 transmitting said identification number from a second terminal  
 9 different from said first terminal, provided at a store, to said commerce  
 10 provider server; and  
 11 transmitting said combined information in correspondence with  
 12 said identification number from said commerce provider server via said  
 13 network to said second terminal;  
 14 carrying out a settlement at the store by the user; and  
 15 delivering said selected goods.

1 9. (Original) The method as set forth in claim 8, wherein said network  
 2 comprises the Internet.

1 10. (New) The method as set forth in claim 6, wherein delivery of said  
 2 selected goods is made to the store where the second terminal is located.

1 11. (New) The method as set forth in claim 10, wherein said network  
 2 comprises the Internet.

1 12. (New) The method as set forth in claim 8, wherein delivery of said  
 2 selected goods is made to the store where said second terminal is located.

1 13. (New) The method as set forth in claim 12, wherein said network  
 2 comprises the Internet.
